Under the Skin

[Ellison & HG Wells' partial but full nightmare:
exhibit a, b, c and d]

Brain tissue, skull, muscle and blood vessels each allotted a sphere of space around them.
Located in a data vault in Moscow's darkest,
an extension of, the remains of
himself Führer….

Nobody could believe
a small hole in the head {

so the matter
went further digitally
analysed so
}
structure reconstructed
the evidence of truth.

logic gate suspension in preservation fluid the thought of being face to virtual face.
Civilised memory had faded necessitating
an embryo of, the image of
twisted character….

Fearful of storing portraits
complete with avatar head {

so the matter
went further digitally
analysed so
}
visualisation separated bone
from tissue and tooth.

Andrew Gryf Paterson, 2000.
